FROM THE DESK OF THE PRESIDENT.....

On the Founder's Day of SRS, I extend my best wishes to the students, parents, guardians and the entire teaching community associated with the school.

I take this opportunity to share with you that the focus of education in the State is heading towards making a visible difference in the learning outcomes of the students. The efforts of entire education department and the teaching cadre is getting anchored in establishing grade appropriate learning levels in core subjects and relentlessly driving pedagogy to achieve them. The Government machinery is backing up this agenda and is driving this from the front.

I call upon the Management, Principal and teachers of SRS to realign their agenda towards making steady progress in achieving measurable learning across all subjects' domains. This is the call of the times and we must adequately prepare ourselves for achieving this paradigm of quality in our education by securing threshold learning in all our students.

We are living in very exciting times where there are a number of opportunities to achieve success in professional life. We, in the education sector, have an onerous responsibility to prepare students in each and every school of the state to enable them to make the best use of these opportunities. We have to ensure that the present generation of our children achieves unprecedented glory and growth in their lives and establish in a new order of prosperity in the State.

I once again congratulate the entire community of SRS on this day and invite you all to recommit yourself to make a difference to the lives of those who need it the most, our students.

T. C. Gupta, I.A.S.

Principal Secretary to Govt. of Haryana,
School Education Deptt., Chandigarh-cum-
Chairman, Board of School Education Haryana- cum-
President, Dr. S.Radhakrishnan Shiksha Samiti, Bhiwani

Message

FROM THE DESK OF THE CHIEF EXECUTIVE DIRECTOR....

"A life of joy and happiness is possible only on the basis of knowledge and science."

- Dr. S. Radhakrishnan

These famous words by Dr. S. Radhakrishnan sum up the efforts and rewards of the pursuit of education in our lives.

We all seek a world of comfort and prosperity in our lives and the foundation of that life is laid in the quality of education in the school. The depth of our education decides the destination we can achieve in our lives.

I call upon all our teachers at SRS to become the beacons of the quality education in the state. Each child presents a unique opportunity that is waiting to be harnessed to reach its potential. It is incumbent on our teachers to treat each child with care and nurture their capabilities and competencies. Teachers must take the responsibility of the learning of each and every child.

As the educationist Sir Ken Robinson says that "We have to recognize that human flourishing is not a mechanical process; it's an organic process. And you cannot predict the outcome of human development. All you can do, like a farmer, is to create the conditions under which they will begin to flourish."We at SRS should commit to create the right conditions.

I congratulate the students and teachers on the Founder's Day of SRS, I look forward to times where we all must actively collaborate to create an environment at SRS that fosters learning in each and every child in the school.

Pankaj, I.A.S.

Secretary,

Board of School Education Haryana, Bhiwani

-cum-

CED, Dr. S. Radhakrishnan Shiksha Samiti, Bhiwani

3. Bhupender (Class-XI) participated in open state archery competition.

The Forthcoming Campaign

SRS – 'The Green Squad'

'SRS-The Green Squad' is going to be the next step of SRS towards social awareness to understand the fragility of our environment and importance of making our earth greener and greener. It is going to be a social movement regarding our concern for the environmental protection and improvement of our planet's health.

SRS believes that promoting environmental awareness is an easy way to become an environmental steward and participate in creating a brighter future for the generations to come.

Via this movement we aim to develop respect, protection and preservation of the natural world from becoming unfit for the earthlings.

Though it is a wide concept but through our efforts we are just trying to do our bit of duty towards environment. Each SRSian is going to pledge to do his/her bit of duty to make it a clean planet, a green planet.

Learning by Doing

Science is 😊 😊 😊 😊 for us.

Me through Colours on Papers

Hands riveted in working on concrete things to gain insight of the abstract.

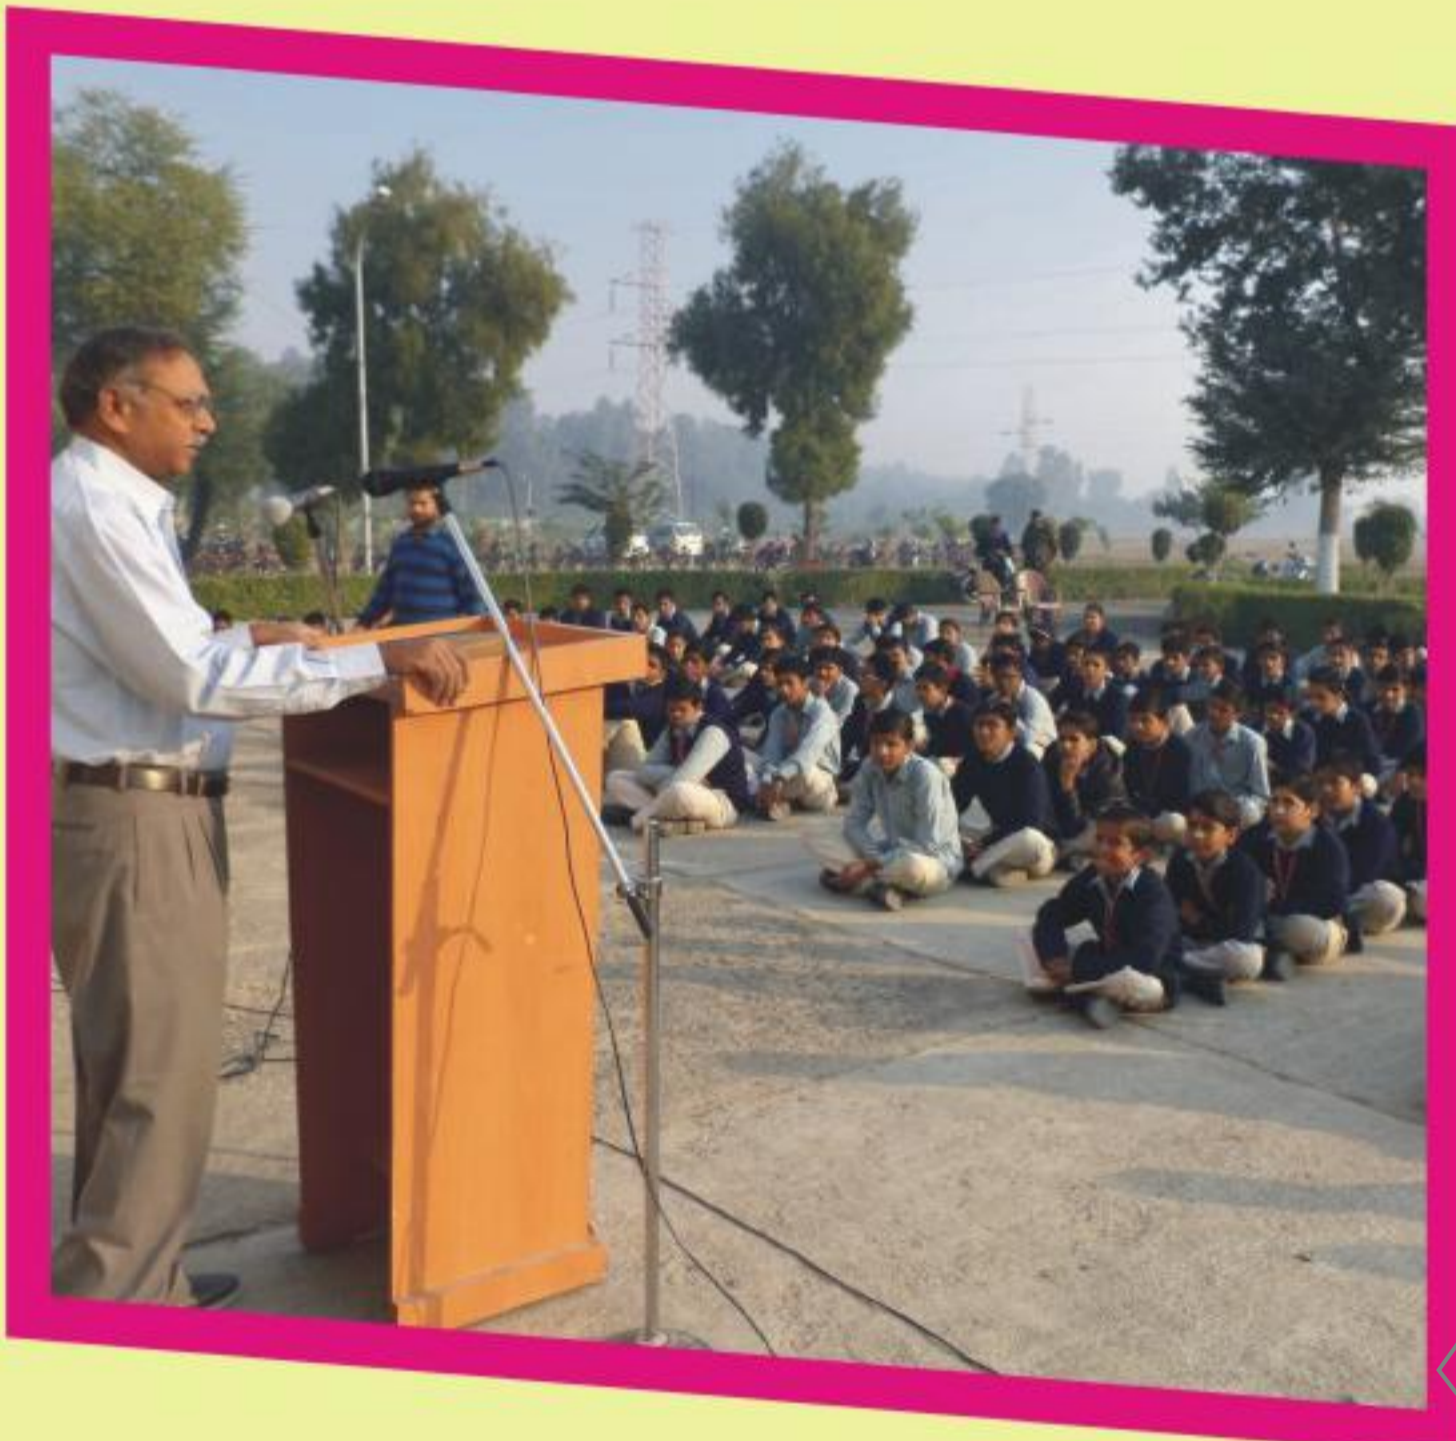

Yellow Day
