Letter No: MSMETC/RTK/2021/06/06/49

Dated: 23.06.2021

To,
Sh. Rajiv Prashad- Secretary
Board of School Education, Haryana

Subject: Creating Awareness about Central Government Skill based newly setup Technology Centre and providing data of SC-ST Students

Respected Sir,

As per our discussion with your good self at your office in Bhiwani, through this letter we would request your good self for sharing of SC-ST Students data (of Standard 10th, 11th & 12th) with us, so that we can reach them and create awareness about higher Education in General engineering sector.

Sir, Ministry of Micro, Small and Medium Enterprises has setup the MSME Technology Centre, Rohtak at Plot no 10 and 11, Sector 30 B, IMT, Rohtak, Haryana - 124021, a Non-Profit organization, on self-sustainable mode of operation in the State of Haryana. The new Technology Centre at Rohtak is a Socio Economic Initiative by Government of India for the benefit of the youth of Haryana and industry of the State of Haryana, which can be considered as the part of the infrastructure provided by the State / Central Government in this industrial estate in order to facilitate the existing / prospective industry to become competitive at a global level. The new Technology is expected to give a significant boost to the MSME's of the region by improving access to skilled youth (manpower) that shall be trained at the new Technology Centre; training to more than 8000 trainees per annum is planned at full Capacity for this new Technology Centre. Also it will give MSME access to latest technology in General engineering sector. The Government of India bears the expenditure in civil infrastructure and equipment for this prestigious centre in Haryana to the tune of around Rs.130crore.

The training at this new Technology Centre started in 2019 and we have trained over 500 students till date. However due to pandemic the awareness through physical mode has received a setback and hence we are unable to reach out to the Youth who can take benefit of this newly established Technology Centre. As this new Technology Centre is established on Self sustain basis, it charges fee for the training, except for SC-ST students, who are provided training at free of Cost (Tuition Fee). From time to time we take benefit of Government scheme (as and when they come), where in education becomes free for OBC/EWC students as well.

Sir, we request your good self to kindly share information about this centre in the State of Haryana and also as requested earlier we request to share the data of SC-ST Students (of Standard 10th, 11th & 12th), so that we can reach them and create awareness about higher Education in General Engineering area and utilize the investment made by Government of India for benefit of the nation.

With Regards,

Yours sincerely,

(Ashwani Kant)
