   (c) A journey of a thousand miles begins with a step.

   (d) A leopard cannot change its spots.

4. Make a precis of the following passage in about one-third of its original length and suggest a suitable title: 35

   What is the future which awaits our children? The underlying assumption of the question that Indian children have a common future is itself dubious. It can legitimately be asked whether a student who is
well-fed, attending a boarding school in a city, and learning to use
computers has any future in common with a malnourished child who
goes to a school with no black-boards, if indeed he goes to school. The
latter may have no worthwhile future at all. And it might be worthwhile
to analyse the significance of this marginalization of more than 75
percent of the children of this country.

The failure to provide an infrastructure for primary education in
the villages of India more than 60 years after Independence is in sharp
contrast with the sophisticated institutions, for technical institutes of
higher learning are funded by government with the money coming from
taxes — both direct and indirect. Hence this financial burden is borne
by all the people. According to L. K. Jha, 25 paise of every rupee spent
on educating an IIT student comes from the pockets of those whose
children may never enter a proper classroom.
